

Kelio Paylink

Payroll interface

A payroll interface module enabling you to extract time management data and export it to a payroll software application.

Simplify your payroll preparation with Paylink

Paylink enables you to transfer time management data in an ASCII file directly into your payroll application format. A powerful correspondence manager lets you link up totals, bonuses, balances and other elements from Kelio with your payroll headings.

WHAT OUR CUSTOMERS SAY:

"With Paylink we managed to interface and configure our Bodet time management software for our 10 companies. This multi-company interface enabled us to reduce our data entry time and automate our data transfer. There's no doubt that Paylink is now our key tool for facilitating our payroll management."

FRANCE GALVA

Bodet
Software

From Kelio to your payroll software

1. **Collection and verification of attendance and absence time** in the Kelio application thanks to automatic calculation and inspection of variable payroll elements (anomaly / alert management).
2. **Automatic transfer** of variable parameters in ASCII files to your payroll software thanks to Kelio Paylink.
3. **Final processing and reports of payslips** in your payroll software.

Increase productivity and save time
